## 2 PROJECT INFORMATION

<b>Project Name:</b>	SUPPORT AND MAINTENANCE FOR THE PARISH DEVELOPMENT MODEL INFORMATION SYSTEM (PDMIS)		
<b>Report</b>	Quarterly Support and maintenance Report	<b>Report Period</b>	From: 12 <sup>th</sup> Sept, 2024 TO: 11 <sup>th</sup> Dec 2024
<b>VENDOR</b>	DERON LIMITED	<b>CLIENT</b>	MINISTRY OF ICT & NATIONAL GUIDANCE
<b>PROJECT START</b>	12 <sup>TH</sup> JUNE, 2024	<b>DURATION</b>	3 YEARS

## 3 BACKGROUND

On 12<sup>th</sup> June 2024, Ministry of ICT and NG entered into a contract with Deron Limited to provide Support and maintenance services for the PDMIS registration and financial inclusion system modules (Procurement Reference: MOICT/CONS/2023-2024/00015).

The objectives of the support and maintenance contract for the PDMIS System include;

- a) To provide Technical Support to address and resolve any issues, bugs, or user queries
- b) To build GoU expertise for enhanced first and second level support on the PDMIS
- c) Ensure best practice in regards to application and database storage and business continuity.
- d) To establish Clear Communication for reporting issues, requesting changes, and providing feedback, ensuring a collaborative relationship between the client and service provider.

- e) To keep Software Up-to-Date by regularly incorporating improvements, and security patches.

### **3.1 SCOPE OF SUPPORT AND MAINTENANCE.**

Under this contract, the Consultant works under supervision of Ministry of ICT and National Guidance to render technical maintenance, support and satisfactory system monitoring service. Details of the same include:-

#### **a) Help Desk for issue reporting**

The Consultant provides a Help Desk and NOC as First-line support to PDMIS FIS and registration system users. This is the first point of contact for users or customers when they encounter issues, have questions, or need assistance with a product or service. This team provides the initial support layer as well as basic customer assistance and troubleshooting. In addition, they use preconfigured tools and dashboards to monitor system health and report any exceptions.

#### **b) Backup and restoration**

The Consultant shall systematically manage and execute scheduled system backups by assisting MOICT&NG in formulating a robust backup and restoration policy, while ensuring strict compliance therewith. Ensure the backup of all vital data and software crucial for the sustained functioning of PDMIS, along with all data mandatorily retained for legislative compliance.

Diligently monitor backups to ascertain successful completion, and implement corrective actions promptly in instances of failure.

**Periodic Restoration Testing:** Conduct regular testing of backup restorations to guarantee data integrity and reliability.

**Reporting:** Disseminate regular reports detailing the status and health of backups to pertinent stakeholders

#### **c) Software Break Fix**

The Consultant shall provide services that are oriented towards troubleshooting, resolving issues, and restoring functionality when problems arise within the software environment.

This process shall start once issues have been logged and include: -

**Bug Fixes:**

- Identifying and resolving software bugs that impede functionality or user experience.
- Providing patches or solutions to fix identified bugs or issues.

**Error Troubleshooting:**

- Investigating and resolving errors and problems that users encounter while using the software.
- Addressing issues related to software crashes, freezes, and unexpected behaviours.

**Data Issues:**

- Assisting in resolving data corruption issues and ensuring data integrity.
- Helping recover data in case of software malfunction or user errors where feasible.

**Security Incidents:**

- Addressing vulnerabilities, providing necessary patches or remedial actions.
- Assisting in mitigating and resolving issues related to a security breach or malware activity.

**User Access Issues:**

- Assisting with problems related to user access, such as login issues and password resets.
- Troubleshooting issues related to user permissions and access controls.

**Integration Challenges:**

- Providing support for issues arising from the integration of the software with other systems or platforms.
- Ensuring that APIs and data flow between integrated systems function correctly after an incident.

**d) System upgrades**

The Consultant shall;

- a) Install software patches, service packs and any other required upgrades
- b) Advise and support GoU on undertaking major upgrades to the solution software
- c) Assessing applicability of the required / recommended service packs / upgrades, updates / fixes and guide on their deployment.
- d) Ensure that all changes to the PDMIS functionality, configuration, system, infrastructure, services and platforms comply with the PDMIS change management procedure.

**e) System Health and Performance Monitoring**

The Consultant shall:

- Set Up a Monitoring System: Establish a monitoring system to ensure services and server uptime, accompanied by a dashboard for real-time visualization and management.
- Perform Operating System Health Checks: Conduct health checks of operating systems for metrics such as disk space, memory, Input/Output (I/O) performance, and CPU performance, working in conjunction with the Government of Uganda (GoU) data center hosting team.
- Execute Database Health Checks: Carry out health checks for the database, focusing on performance, security, errors, patching, objects integrity, and data corruption, as well as monitoring memory, storage, and backup performance.
- Advise and Support Security Implementations: Provide advice and assist in the implementation of security configurations and adherence to best practices for the Project Data Management Information System (PDMIS).

**f) Implement Audit Recommendations:**

Support Quality Assurance and Audits: Provide comprehensive support during all quality assurance assessments and information security audits related to the PDMIS.

Ensure the prompt and timely implementation of all audit recommendations, adhering strictly to provided timelines.

**g) Knowledge Transfer**

The government seeks to train a robust team that can proficiently handle both technical and functional aspects of the PDMIS system.

The Consultant is therefore required to facilitate comprehensive functional and technical training for the GoU's Trainer of Trainers, as well as database, system, and network administrators. This should empower them with the requisite knowledge to proficiently support and maintain the system. Employ varied training methodologies, such as work shadowing, paired work, instructor-led training, developer meetups, and walkthrough training sessions.

- **Reporting requirement**

The Consultant will work closely with the PDMIS Contract Manager on day-to-day operations of the contract.

The Consultant shall prepare monthly performance reports of the PDMIS system and system support provided. In addition, the Consultant shall prepare quarterly performance reports detailing the support rendering. The report shall among others include metrics such as system availability, incident trends, fault resolution times, and any other relevant performance indicators. This report shall be used for payment.

As part of the reporting requirements, the Consultant is required to provide monthly reports in addition to quarterly reports. This report is submitted in fulfillment of that requirement and covers the reporting period listed below.

The report highlights the achievements, challenges, and service improvement plans related to the support and maintenance of the PDMIS

## 4 REPORT SUMMARY

### 4.1 KEY HIGHLIGHTS/ACHIEVEMENTS

#	HIGHLIGHTS/ACHIEVEMENT IN THE REPORTING PERIOD
a.	Successfully rolled out account unlock feature which resulted in decrease of tickets by more than 50%
b.	Maintained average closure rate above 98% resolving 6,808 tickets compared to 5,113 tickets the previous quarter.
c.	Conducted supervised backup restoration testing. Three full database restoration tests were conducted with MOICT staff and all were successful.
d.	Commenced a number of data clean up activities including: -- <ol style="list-style-type: none"><li>1. Removal of duplicate NINs and phone numbers from the system</li><li>2. Corrected admin units mismatch for 14482 beneficiaries who were getting NULL error.</li></ol>
e.	Developed, tested and deployed a number of system enhancements, including:- <ol style="list-style-type: none"><li>1. Loan revocation</li><li>2. change of SACCO leadership</li><li>3. Changes on loan application form interface to make new loans default and added help text i to reduce accidental backlog entries</li></ol>
f.	Deployment of key System changes and enhancements which have enhanced quality of service like delegation role, decentralization of key tasks to CAO, bulk payment verification, extension of password expiry for inactive accounts to 180 days, password policy, etc
g.	Conducted a knowledge transfer training session for four (4) officials nominated by the ministry. The training covered key areas, including system infrastructure, version control systems, codebase structure, and functional logic and processes.
h.	Facilitated weekly user training clinics organized by MoFPED and MoICT, enhancing knowledge sharing, capacity building, and user problem-solving.

## 4.2 KEY LOW LIGHTS/CHALLENGES/RISKS

#	<b>Lowlights/challenges in the reporting period</b>
a.	Disconnection of the UTL line and lack of airtime for follow-up calls on the MTN line slowing down the response time and creating anxiety among users.
b.	Absence of a formal, coherent joint PDMIS-WENDI ticket handling system especially for individual tickets submitted on WhatsApp
c.	Service Desk Team still don't have some tools, e.g proper call-center line, which means when SD Agent is on the call, other users can't go thru; airtime on one phone which affects follow-up, as well as TV display, which are expected from MOICT.
d.	The lack of staff identification makes it challenging to access the Ministry and creates difficulties in entering the Office during certain times. MOICT should provide identification for SD staff
e.	We are unable to do Quality Assurance on the calls because current setup (mobile phones) doesn't support recording
f.	Insufficient disk space to handle retention of backups and the growing needs of infrastructure resources to avoid possible risks. MOICT should engage NITA-U for a lasting solution
g.	SD is using an excel sheet which has limitations on automation, notification and other aspects – MOICT should expedite provision of a ticketing solution.
h.	Identified mismanagement of system roles and permissions, evident in the improper assignment of access rights to certain user roles within the household registration system.
i.	Noted ongoing complaints regarding failed editing and updates in the PDMIS x FIS, largely due to users repeatedly not adhering to the established Standard Operating Procedures (SOPs).

## 5 DETAILED SUPPORT AND MAINTENANCE REPORT

### 5.1 HELP DESK AND ISSUE REPORTING

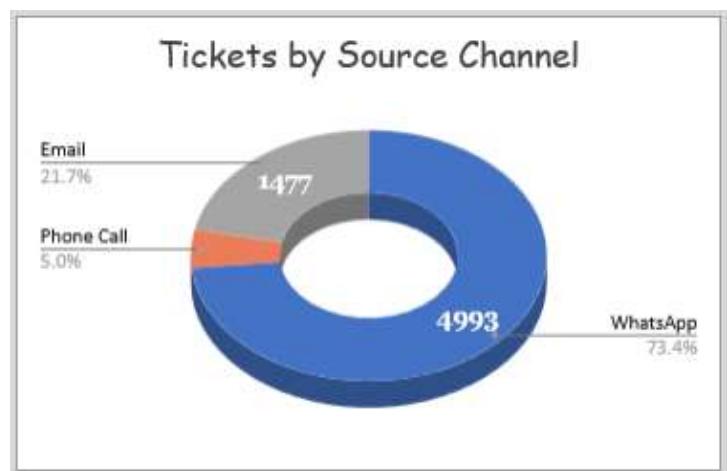

Total Tickets	Closed Tickets	Tickets On Hold	Tickets In Progress	New Tickets
6808	6808	0	0	0

During the quarter, 6,808 tickets were logged and successfully resolved, with no tickets remaining on hold or in progress by the end of the period. In contrast, the previous quarter had 4 tickets on hold and 3 in progress. This reflects a notable improvement in the efficiency of the resolution process. A detailed list of these tickets can be found in Appendix 2.

The closure of over 97% of tickets each week highlights strong resolution efficiency. The overall weekly ticket volume has significantly decreased due to two key factors: the introduction of a self-unblocking feature, which has substantially reduced

ticket counts by eliminating approximately 500 requests per week, and the current disbursement phase, where the majority of funds have already been distributed, resulting in fewer related inquiries.

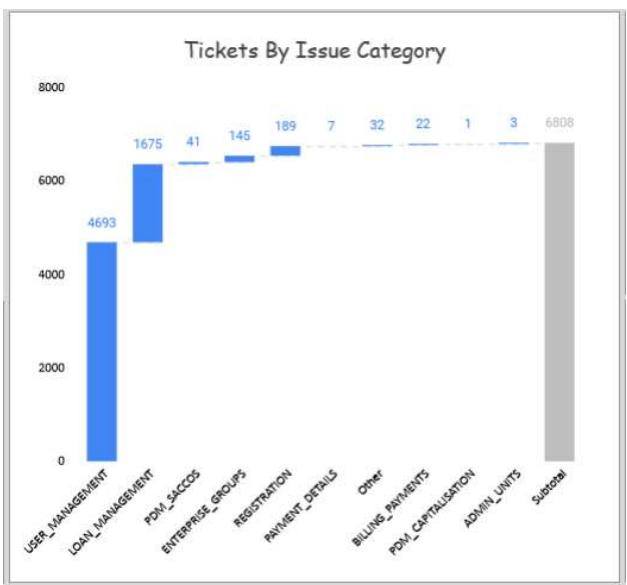

**By Ticket Source**, WhatsApp remained the leading communication channel, accounting for 73% of all tickets, a slight increase from 70% in the previous quarter. Email usage saw a significant rise to 21%, up from 15% last quarter, while phone calls dropped to 5%, compared to 15% previously. This shift in user preferences could be

attributed to the accessibility of WhatsApp for real-time communication. The decline in phone calls results from users favoring digital channels for their reduced waiting times.

**By Ticket Priority**, only one High-priority issue was logged during the quarter, related to a "503 Service Unavailable" error that affected all system users for a few hours. This marks a significant improvement compared to the previous quarter, where 0.6% of tickets were categorized as high priority, indicating better management of urgent issues.

For Medium-priority tickets, the top three concerns included SACCOs failing to disburse despite a WENDI sent status, backlog loan status reversals, and SACCO leaders being unable to perform approvals. Low-priority requests mainly comprised unblocking, editing payment details, and account creation.

**By ticket categorization**, User Management accounted for 68% (4,693 tickets), remaining the dominant category. However, this reflects a decrease from last quarter's 75% (3,837 tickets). This drop is attributed to the introduction of the automated unblocking feature. The primary concerns revolved around roles, permissions, and account activations.

Loan Management, the second-largest category, comprised 1,675 tickets. It primarily dealt with beneficiary detail corrections, backlog reversals, and "Cannot find customer loan info" error.

Although relatively fewer in number, tickets related to the Registration interface are showing a gradual increase. These requests predominantly reflect capacity-building needs, suggesting a growing interest in enhancing user skills and understanding of the system.

**Closure time by channel** (a metric introduced this quarter) indicates revealed that tickets submitted via WhatsApp were resolved the fastest, averaging 3.9 hours, while tickets received via Email took 6 hours, and phone call issues had the longest average closure time of 9 hours.

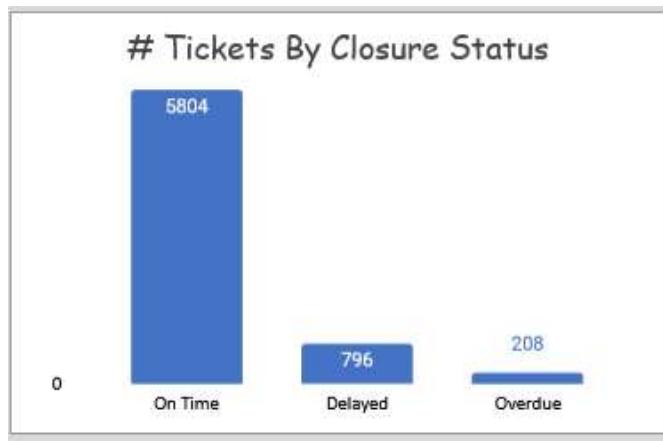

The swift resolution of WhatsApp tickets reflects its efficiency as a real-time communication tool, likely benefiting from faster back-and-forth exchanges between users and SD team.

While slower than WhatsApp, the 6-hour average for Email suggests that it serves well for more detailed queries, albeit requiring additional time for backlogged responses and file handling.

The extended closure time of 9 hours for phone calls was influenced by specific operational challenges:

**Resource Issues:** Delays arose due to the unavailability of airtime for follow-ups and the disconnection of a key UTL service desk line.

**Team Constraints:** Staff involvement in CPIS training and a public holiday further disrupted responsiveness during the period.

**In absolute numbers,** A total of 5,804 tickets were resolved within the required timeframe, accounting for the majority of cases. However, 208 tickets exceeded their due dates, and 796 tickets were delayed beyond typical resolution expectations. While a relatively small proportion, overdue tickets highlight instances where response workflows

disrupted the team's ability to meet deadlines. Our routine trainings are expected to address any isolated bottlenecks in handling certain ticket categories or channels. This is one of the key reasons for introducing this metric during the quarter, to gain more insight into potential areas for improvement.

## 5.2 BACKUP AND RESTORATION

Backups are scheduled to run daily from 00:00 to 01:00. This includes database backups on the DB servers and application backups on the application servers. The backup files are named with the current date and time, such as pdmis\_fis-1112240000.sql.gz for December 12, 2024, at midnight. Once the backups are completed, they are transferred to the backup server at 03:00 where they are stored and archived.

Additionally, complete virtual machine backups are conducted by NITA-U for business continuity purposes.

The table below shows all the servers being backed up.

Server Name	Server Role	Guest OS	IP Address
PDMIS APP1	PDMIS primary web application server	UBUNTU 20-04	10.255.4.162
PDMIS APP2	PDMIS Secondary web application server	UBUNTU 20-04	10.255.4.163
PDMIS DB1	PDMIS database server	UBUNTU 20-04	10.255.4.164
BACKUP	Backup server	UBUNTU 20-04	10.255.4.165
FIS APP1	FIS primary web application server	UBUNTU 20-04	10.255.4.168
FIS APP2	FIS secondary web application server	UBUNTU 20-04	10.255.4.169
FIS DB	FIS Database Server	UBUNTU 20-04	10.255.4.170
PREPROD /TESTAPP	Preprod web application server	UBUNTU 20-04	10.255.4.166
PREPROD DB	Preprod database	UBUNTU 20-04	10.255.4.166
LOADBALANCER	Web proxy and load balancing server	UBUNTU 20-04	10.255.4.167

For the latest test, a database back up from 12<sup>th</sup> December, 2024 (file name pdmis\_fis-1112240000.sql, including 54 database tables) was selected for restoration on the preprod server. The file was securely transferred from the backup server, and the restoration process took place from 14:00 hrs on 12<sup>th</sup> December 2024. The backup completed successfully in 15:19 hrs.

### 5.3 SOFTWARE UPDATES/PATCH MANAGEMENT

Using the unattended patch management feature some critical OS patches were installed on the servers successfully. A log of the same is attached in Appendix 1: Patch log

### 5.4 IMPLEMENTATION OF AUDIT RECOMMENDATIONS

OAG performed an audit on the PDMIS and shared recommendations for closure by the vendor. In response, the Vendor has closed all but 2 of the issues identified, which have a dependency on the email server working.

## 5.5 SYSTEM HEALTH AND PERFORMANCE MONITORING

Our engineers and developers routinely perform system checks as part of their work. These checks include monitoring the following:

- a) CPU performance
- b) Disk usage and utilization
- c) RAM usage and utilization
- d) Application reachability
- e) Etc.

Additionally, automated monitoring is conducted via our Zabbix system, with the results presented in the table below.

As shown, all monitoring parameters, except for disk space on FISDB1 and PDMIS\_DB1. We are exploring further optimization for long term solution.

Figure 1: Summary Table showing resource utilization

Server Role	vCP Us	Utilizati on % (Peak)	Utilizati on % (Averag e)	Memory (GB)	Utilizati on % (Peak)	Utilizati on % (Averag e)	Disk Space (TB)	Utilizati on % (Averag e)
FISAPP1	6	49.52	4.77	31.32 GB	84.87	18.09	1TB	64.78
FISDB1	40	10.22	0.49	23.44 GB	99.05	92.53	34.15 GB	11.02
LB	6	36.73	0.96	11.65 GB	10.71	9.91	34.15 GB	17.29
PDMISAP P1	16	18.59	1.96	23.44 GB	69.17	30.68	500GB	77.265
PDMISAP P2	16	15.95	0.58	23.44 GB	19.44	10.76	34.15 GB	63.12
PDMIS_DB1	45	35.10	7.04	94.27 GB	99.87	94.93	34.15 GB	48.015

PreProd	8	23.60	0.31	11.65 GB	78.52	77.64	196 GB	43.7
---------	---	-------	------	-------------	-------	-------	-----------	------

## 5.6 KNOWLEDGE TRANSFER

As part of the knowledge transfer, the following activities were conducted during the reporting period:

- a. **Clinics:** Consultant has participated in the monthly and weekly Clinics. These sessions were online and information shared includes new features as well as recap on old features on the system
- b. **Introduction to Wendi Session:** The Wendi team conducted a session to familiarize the Service Desk with how Wendi operates and how to troubleshoot issues.
- c. **FAQ Creation:** FAQ articles were developed based on the areas generating the most tickets.
- d. **Orientation Sessions:** Developers provided orientation sessions to the Service Desk to update them on the latest system changes.

These activities will continue as part of ongoing support

## 5.7 PROGRESS REPORTING

As part of the contract, the vendor is required to provide monthly and quarterly support and maintenance reports. This document is in fulfilment of the monthly reporting requirement.

So far two monthly reports have been submitted and this is the first quarterly report under the contract. Monthly reports will be submitted in the period ending 11th of each month and a quarterly report at the end of each quarter.

## 6 PLANNED ACTIVITIES

#		ACTIVITY
1.	BAU	Continue providing Help Desk services of issue reporting, resolution and first line support. In addition, system upgrades, patching
2.	BAU	Continue backup restoration testing by including MOICT staff who must request and sign-off on all restoration requests.
3.	BAU	Improve QA and closer supervision of Service Desk to ensure maximum productivity of Agents.
4.	BAU	Continue providing System upgrades fixes where and when required to improve system efficiency
5.	BAU	Continue providing System Health and Performance Monitoring
6.	BAU	Continue providing Knowledge Transfer. Specifically, by joining Monthly Clinics, FAQ development and update of User manuals as well as a training session with MOICT technical team
7.	BAU	Continue Reporting on progress. Specifically monthly and quarterly reports.
8.	Improvement	Complete outstanding tasks on audit findings by OAG
9.	Improvement	Continue data clean up activities – including EGs with mismatch of admin units
10.	Improvement	Implement system enhancements like verification of all NINs for users who have not been validated on the system so far
11.	Improvement	Conduct knowledge transfer for technical resources on the backend of the system

## 7 RISKS REGISTER

#	Risk Description	Rating	Mitigation/Recommend	Responsible
1.	Decreased support and decreased customer satisfaction due to late payments.	High	<p><b>Mitigation Measure:</b> Vendor has made some payments to the staff as it waits, and staff is trying to work from home, however this is not sustainable</p> <p><b>Recommendation:</b> Expedite payments to consultant once invoice has been raised</p>	MoICT
2.	Increased customer dissatisfaction and increased resolution time due to lack of airtime that is needed to make outbound follow-up calls	High	<p><b>Mitigation Measure:</b> Consultant is providing airtime for the moment.</p> <p><b>Recommendation:</b> MOICT should provide complete post-paid call-center setup with call concurrency call recording and analysis, etc</p>	MoICT
3.	Increased system warnings and failures due to the absence of a real-time monitoring display in the SD room for early detection	High	<p><b>Mitigation Measure:</b> Engineers from Consultant side were monitoring, however, without system access, this is also not possible now.</p> <p><b>Recommendation:</b> MOICT should urgently provide a display so that system monitoring tool and other critical things can be projected on a large display.</p>	MOICT

#	Risk Description	Rating	Mitigation/Recommend	Responsible
4.	Delay or disruption of service by SD staff due to the inability to access MOICT premises and surrounding areas caused by the lack of proper identification.	High	<p><b>Mitigation Measure:</b> SD staff are building rapport with MOICT staff and calling MOICT staff incase they are denied entry, but this is not sustainable.</p> <p><b>Recommendation:</b> MOICT to provide Help Desk Staff with identification asap.</p>	MOICT
5.	Reduced customer satisfaction and inability to improve quality of service due to the current phone setup, which does not support concurrent calls or call recording and analysis	High	<p><b>Mitigation Measure:</b> Consultant has procured mobile phones and has provided airtime.</p> <p><b>Recommendation:</b> MOICT should expedite setup of a proper call center with multiple channels and lines to increase number of calls we can receive concurrently as well as enable quality assurance of SD staff</p>	MOICT
6.	Delay in call resolution and delayed user satisfaction due to the limitations of the Excel-based ticketing solution that can't send notifications, perform routing, and conduct analytics on tickets	High	<p><b>Mitigation Measure:</b> Advanced functions in excel are being used.</p> <p><b>Recommendation:</b> MOICT should implement a proper ticketing tool that allows logging of calls from all channels and also escalation, notifications and analytics</p>	MOICT
7.	Inability to recover data and comply with backup retention policy due to insufficient storage	High	Mitigation Measure: None	MOICT

#	Risk Description	Rating	Mitigation/Recommend	Responsible
	space. Retention is limited to only 1- month.		<b>Recommendation:</b> MOICT should engage NITA-U with a view of finding a lasting solution for storage of backups.	
8.	Server-related faults and issues could go undetected or unresolved because critical DevOps resource has been denied access to PDMIS servers	High	<b>Recommendation:</b> MOICT should follow-up with NITA-U to fast track request to onboard Alex. Email already sent more than one month back	MOICT
9.	Increased dissatisfaction, complaints and data inaccuracy due to absence of a streamlined way to manage editing of NINs, phone numbers and payment details for users with loan applications.	High	<b>Mitigation Measure:</b>  <b>Recommendation:</b> MOICT should streamline the editing and update of information for beneficiaries who already have loans to enable users with legitimate reasons to update their records on the system	MOICT

## 8 APPENDIX

### 8.1 Appendix 1: Backup Restoration testing forms

PDMIS BACKUP RESTORATION FORM	
BACKUP RESTORATION REQUEST DETAILS (FILLED BY REQUESTOR)	
Date/Time: 11 <sup>th</sup> October 2024	Reason for request: Witness and sign off on backup restoration tests
Name of Requestor: Mr. Kakooza Emma	Signature of Requestor
Name of Approver	Signature of Approver
BACKUP DETAILS (FILLED BY SYSTEMS ADMINISTRATOR)	
Date/time of backup: 14/10/2024 3:00 AM	Type of backup: Full Database Backup
Source of backup: Backup server 10.255.4.165	Restoration destination: Preproduction Server 10.255.4.166 
RESTORATION PLAN (FILLED BY SYSTEMS ADMINISTRATOR)	
Restoration Procedure: <ul style="list-style-type: none"><li>Located the most recent backup file, pdmis_fis-1410240000.sql.gz (14/10/2024) from the backup server.</li><li>Transferred the backup file to the pre-production environment using Secure Copy Protocol (SCP).</li><li>Decompressed the .gz file and extracted the SQL database dump.</li><li>Removed the existing target database from the MySQL server to make way for the new backup.</li><li>Modified the restoration .sh script to point to the new backup file and</li></ul>	Date of test: Mon Oct 14 20:10:01 EAT 2024
	Expected Result: A complete restoration of the FIS Production database, including all 54 tables and their data, on the pre-production server. This outcome was anticipated following the restoration process.
	Actual Results (Pass/Fail) PASS

specified the correct file path within the script. <ul style="list-style-type: none"><li>Adjusted the cronjob to run the updated restoration script: 10 20 14 10 1 /opt/backuprestore_xxxxxxxxxx.sh &gt;&gt; /opt/backupres_xxxxxxxxxx.log 2&gt;&amp;1.</li><li>This cronjob was executed on <b>Monday, October 14, 2024, at 20:10:01 EAT</b> and completed at <b>21:11:42 EAT</b>.</li><li>The restoration process was successfully completed and verified.</li><li>The restoration report was automatically logged in the .log file as defined in the script and is attached herewith.</li></ul>	Name and Signature of tester: Mukisa Vicent

## PDMIS BACKUP RESTORATION FORM

BACKUP RESTORATION REQUEST DETAILS (ILLED BY REQUESTOR)	
Date/Time: 11 <sup>th</sup> November 2024	Reason for request: Witness and sign off on backup restoration tests
Name of Requestor: Mr. Kakooza Emma	Signature of Requestor
Name of Approver	Signature of Approver

BACKUP DETAILS (ILLED BY SYSTEMS ADMINISTRATOR)	
Date/time of backup: 11/11/2024 3:00 AM	Type of backup: Full Database Backup  PARISH DEVELOPMENT MANAGEMENT INFORMATION SYSTEM
Source of backup: Backup server 10.255.4.165	Restoration destination: Preproduction Server 10.255.4.166

RESTORATION PLAN (ILLED BY SYSTEMS ADMINISTRATOR)	
Restoration Procedure:	Date of test: Mon Nov 11 2024 17:00:01 EAT
	Expected Result: A complete restoration of the FIS Production database, including all 54 tables and their data, on the pre-production server. This outcome was anticipated following the restoration process.

- Removed the existing target database from the MySQL server to make way for the new backup.
- Modified the restoration .sh script to point to the new backup file and specified the correct file path within the script.
- Adjusted the cronjob to run the updated restoration script: 10 20 14 10 1 /opt/backuprestore\_xxxxxxxxxx.sh >> /opt/backupres\_xxxxxxxxxxx.log 2>&1.
- This cronjob was executed on Monday, November 11, 2024, at 17:00:01 EAT and completed at 18:16:47 EAT.
- The restoration process was successfully completed and verified.
- The restoration report was automatically logged in the .log file as defined in the script and is attached herewith.

### Actual Results (Pass/Fail)

PASS

## 8.2 Appendix 2: PATCH LOG

### Patch Log 1:

**Package Name:** libmysqlclient21:amd64

**Patch Type:** Upgrade

**Urgency:** Medium

**Objective of the Patch:**

- The upgrade from version 8.0.39-0ubuntu0.20.04.1 to 8.0.40-0ubuntu0.20.04.1 addresses minor performance improvements and bug fixes for MySQL client libraries, enhancing compatibility with MySQL server versions.

**Impact of the Patch:**

- Improved client-server communication reliability for database operations.

**Date and Time of Patch:**

- Start-Date: 2024-11-14 06:06:37
- End-Date: 2024-11-14 06:06:38

**Command Executed:**

- /usr/bin/unattended-upgrade

---

### Patch Log 2:

**Package Name:** libgd3:amd64

**Patch Type:** Upgrade

**Urgency:** Low

**Objective of the Patch:**

- The upgrade from version 2.2.5-5.2ubuntu2.1 to 2.2.5-5.2ubuntu2.4 includes security fixes and minor enhancements for the GD graphics library, which is used for creating and manipulating images.

**Impact of the Patch:**

- Enhanced security and stability for applications relying on image processing.

**Date and Time of Patch:**

- Start-Date: 2024-11-16 06:30:59
- End-Date: 2024-11-16 06:31:00

**Command Executed:**

- /usr/bin/unattended-upgrade

---

Patch Log 3:

**Package Name:** libglib2.0-bin:amd64, libglib2.0-0:amd64

**Patch Type:** Upgrade

**Urgency:** Medium

**Objective of the Patch:**

- The upgrade from version 2.64.6-1~ubuntu20.04.7 to 2.64.6-1~ubuntu20.04.8 for both packages ensures compatibility updates and bug fixes for GLib, the low-level core library that forms the basis of the GNOME ecosystem.

**Impact of the Patch:**

- Enhanced system stability and compatibility for applications built on the GNOME stack.

**Date and Time of Patch:**

- Start-Date: 2024-11-20 06:20:00
- End-Date: 2024-11-20 06:20:03

**Command Executed:**

- /usr/bin/unattended-upgrade

Patch Log 4

**Package Name:** libglib2.0-data:amd64

**Patch Type:** Upgrade

**Urgency:** Low

**Objective of the Patch:**

- The upgrade from version 2.64.6-1~ubuntu20.04.7 to 2.64.6-1~ubuntu20.04.8 introduces minor updates and bug fixes to improve the stability and performance of the GLib data package, which is a core part of the GNOME project.

**Impact of the Patch:**

- Enhanced stability for applications relying on GLib for fundamental system and application interactions.

**Date and Time of Patch:** Start-Date: 2024-11-20 06:20:10, End-Date: 2024-11-20 06:20:10

**Command Executed:** /usr/bin/unattended-upgrade

---

## 8.2.1 Patch Log 5

**Package Name:** libpython3.8-minimal:amd64, libpython3.8:amd64, python3.8:amd64, python3.8-minimal:amd64, libpython3.8-stdlib:amd64

**Patch Type:** Upgrade

**Urgency:** Medium

**Objective of the Patch:**

- The upgrade from version 3.8.10-0ubuntu1~20.04.12 to 3.8.10-0ubuntu1~20.04.13 addresses critical bug fixes and security enhancements for Python 3.8 libraries and executables, ensuring smoother operations for Python-based applications.

**Impact of the Patch:**

- Improved security and compatibility for software depending on Python 3.8.

**Date and Time of Patch:** Start-Date: 2024-11-21 06:30:03, End-Date: 2024-11-21 06:30:10

**Command Executed:** /usr/bin/unattended-upgrade

---

## Patch Log 6

**Package Name:** python2.7-minimal:amd64, python2.7:amd64, libpython2.7-minimal:amd64, libpython2.7-stdlib:amd64

**Patch Type:** Upgrade

**Urgency:** Low

**Objective of the Patch:**

- The upgrade from version 2.7.18-1~20.04.4 to 2.7.18-1~20.04.5 includes minor bug fixes and ensures continued functionality for legacy Python 2.7 components.

**Impact of the Patch:**

- Stability improvements for legacy systems and applications that depend on Python 2.7.

**Date and Time of Patch:** Start-Date: 2024-11-21 06:30:16, End-Date: 2024-11-21 06:30:21

**Command Executed:** /usr/bin/unattended-upgrade

## Patch Log 7

**Package Name:** python2.7-minimal:amd64, python2.7:amd64, libpython2.7-minimal:amd64, libpython2.7-stdlib:amd64

**Patch Type:** Upgrade

**Urgency:** Low

**Objective of the Patch:**

- The upgrade from version 2.7.18-1~20.04.5 to 2.7.18-1~20.04.6 introduces bug fixes and minor updates to maintain compatibility and stability for Python 2.7 components.

**Impact of the Patch:**

- Continued functionality for legacy systems that rely on Python 2.7 with minor improvements.

**Date and Time of Patch:** Start-Date: 2024-11-23 06:39:01, End-Date: 2024-11-23 06:39:06

**Command Executed:** /usr/bin/unattended-upgrade

---

## Patch Log 8

**Package Name:** python3-twisted-bin:amd64

**Patch Type:** Upgrade

**Urgency:** Medium

**Objective of the Patch:**

- The upgrade from version 18.9.0-11ubuntu0.20.04.4 to 18.9.0-11ubuntu0.20.04.5 resolves minor issues and enhances stability for the Twisted framework's binary components used in asynchronous Python programming.

**Impact of the Patch:**

- Improved reliability for applications relying on Twisted's core functionalities.

**Date and Time of Patch:** Start-Date: 2024-11-27 06:24:23, End-Date: 2024-11-27 06:24:25

**Command Executed:** /usr/bin/unattended-upgrade

---

## Patch Log 9

**Package Name:** python3-twisted:amd64

**Patch Type:** Upgrade

**Urgency:** Medium

**Objective of the Patch:**

- The upgrade from version 18.9.0-11ubuntu0.20.04.4 to 18.9.0-11ubuntu0.20.04.5 introduces enhancements and bug fixes to the Twisted framework for Python 3, optimizing its asynchronous programming features.

**Impact of the Patch:**

- Enhanced performance and reduced potential errors for applications utilizing the Twisted library.

**Date and Time of Patch:** Start-Date: 2024-11-27 06:24:31, End-Date: 2024-11-27 06:24:37

**Command Executed:** /usr/bin/unattended-upgrade

## Patch Log 10

**Package Name:** vim-common:amd64, vim-runtime:amd64, vim:amd64, vim-tiny:amd64

**Patch Type:** Upgrade

**Urgency:** Medium

**Objective of the Patch:**

- The upgrade from version 2:8.1.2269-1ubuntu5.25 to 2:8.1.2269-1ubuntu5.29 provides bug fixes and minor feature enhancements to the Vim text editor and its associated components.

**Impact of the Patch:**

- Improved functionality, enhanced stability, and minor usability improvements for Vim and its runtime components.

**Date and Time of Patch:** Start-Date: 2024-11-28 06:10:39, End-Date: 2024-11-28 06:10:45

**Command Executed:** /usr/bin/unattended-upgrade

---

## Patch Log 11

**Package Name:** libsoup2.4-1:amd64

**Patch Type:** Upgrade

**Urgency:** Low

**Objective of the Patch:**

- The upgrade from version 2.70.0-1 to 2.70.0-1ubuntu0.1 delivers bug fixes and minor updates for the libsoup HTTP client/server library, enhancing its stability and security.

**Impact of the Patch:**

- Improved performance and reliability for applications utilizing the libsoup library for HTTP communication.

**Date and Time of Patch:** Start-Date: 2024-11-28 06:10:53, End-Date: 2024-11-28 06:10:54

**Command Executed:** /usr/bin/unattended-upgrade

---

## Patch Log 12

**Package Name:** xxd:amd64

**Patch Type:** Upgrade

**Urgency:** Low

**Objective of the Patch:**

- The upgrade from version 2:8.1.2269-1ubuntu5.25 to 2:8.1.2269-1ubuntu5.29 provides bug fixes and enhancements for xxd, a hexdump tool that is part of the Vim suite.

**Impact of the Patch:**

- Enhanced stability and usability for developers and users working with hexadecimal representations of data.

**Date and Time of Patch:** Start-Date: 2024-11-28 06:11:01, End-Date: 2024-11-28 06:11:03

**Command Executed:** /usr/bin/unattended-upgrade

## Patch Log 13

**Package Name:** libpq5:amd64

**Patch Type:** Upgrade

**Urgency:** Medium

**Objective of the Patch:**

- The upgrade from version 12.20-0ubuntu0.20.04.1 to 12.22-0ubuntu0.20.04.1 provides security fixes, stability enhancements, and minor performance improvements for the PostgreSQL client library (libpq5).

**Impact of the Patch:**

- Enhanced security and reliability for database interactions using PostgreSQL, ensuring compatibility with the latest server updates.

**Date and Time of Patch:** Start-Date: 2024-12-04 06:33:41, End-Date: 2024-12-04 06:33:42

**Command Executed:** /usr/bin/unattended-upgrade
